HAPPY DOG

HAPPY DOG HARNESSES – pure enjoyment for your dog

- The pulling point of the harness lies above the breastbone and stays in place, protecting the dog from pain and throat and neck injuries even when it pulls.
- Only Happy Dog harnesses are available in three separate parts, allowing each dog to have a custom-fitted harness.
- The chest strap and belly strap fit together in such a way that the dog cannot escape from the harness, provided the correct size is used.
- The harness does not require sliding over the head, avoiding unnecessary stress to the dog.
- Special padded material ensures that the snap-buckles do not chafe the skin or fur.
- Each part is stitched with reflective material, making the dog visible in the dark.
- All harnesses are machine-washable at 30°C.
- NEW! Mini-harnesses now available for small dogs!

HAPPY DOG SHOCK ABSORBERS – gentle on your hand and on your dog's neck

- The shock absorber fits between the collar/harness and the leash/flexi and reduces the tension caused by pulling.
- It is an excellent aid when teaching your dog to walk nicely on leash.
- The shock absorber stretches when the dog or person pulls, reducing discomfort and the risk of injury to the dog's neck or the person's hand.
- The shock absorber makes walks less stressful for both dog and human, as there is less pulling.
- The shock absorber is available in different strengths suitable for all kinds of dogs.
- It can also be used at the end of tethers in yards, gardens etc.
- The shock absorber is machine-washable at 30°C.

HAPPY DOG COLLARS – irritation free!

- Happy dog collars have no buckles or clasps.
- The collars are wide, avoiding pressure and injury between the neck vertebrae. They come in three widths: 2 cm (Mini), 4.5 cm (Midi) and 7 cm (Maxi).
- Each collar is fully quilted, ensuring that your dog's neck does not get painfully squeezed or pinched.
- The entire collar is stitched with reflective material, making the dog visible in the dark.
- Available in the same colours as leashes, shock absorbers and harnesses.
- All collars are machine-washable at 30°C.

HAPPY DOG LEASHES – BE SEEN IN THE DARK!

- Happy Dog leashes are stitched on both sides with reflective material for clear visibility in the dark.
- A poop-bag holder is discreetly attached near the wristband, so you always have them with you — making it easy to pick up after your dog.
- Happy Dog leashes have three widths: 1 cm, 2 cm and 3 cm, for all sizes and strengths of dog.
- The leashes also come in three lengths for every occasion: 1 m ("City leash"), 2.2 m and 3 m.
- The wristband is quilted for maximum comfort and is available in the same colours as the harnesses, collars and shock absorbers.
- Happy Dog leashes are machine-washable at 30°C.
- NEW! Happy Dog integrated leash with sewn-in shock absorber, ideal for small dogs!
